

iREJU

WHITE SERUM

Skinbooster for pure white skin

iREJU WHITE SERUM

PACKING

3mL x 5 vials
5 vials x 1 box

INDICATIONS

Dermal anti-aging and whitening ampoule iREJU WHITE SERUM improves skin regeneration to prevent wrinkles, thickens the barrier and also brightens the skintone.

EFFECT

Skin Regeneration

Strong Skin Barrier

Improved Wrinkles

Brightened Skintone

Anti-inflammatory

MAIN INGREDIENTS

Amino Acid Complex

Amino acids help maintain the skin's moisture barrier, keeping it hydrated, smooth, and resilient. They also support collagen and elastin production, which improves firmness, healing, and overall skin strength.

Sodium Hyaluronate

Sodium hyaluronate deeply hydrates the skin by attracting and holding moisture, helping to keep it plump and smooth. It also strengthens the skin barrier and improves elasticity, giving the complexion a healthier, more supple appearance.

Glutathione

Glutathione brightens the skin by reducing melanin production, helping to fade dark spots and discoloration. It also works as a powerful antioxidant, protecting the skin from oxidative stress and improving overall clarity and radiance.

Tranexamoyl Dipeptide-23

Provides improved skin tone and can enhance whitening effects. Acts as an anti-inflammatory and anti-allergic agent. Offers hemostatic benefits and excellent anti-pigmentation properties.

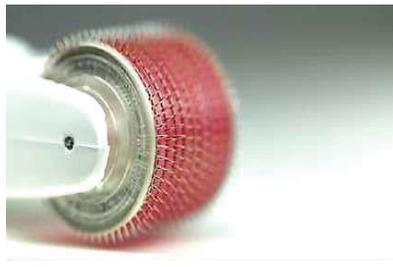

Niacinamide

Niacinamide helps strengthen the skin barrier, improving moisture retention and reducing redness and irritation. It also brightens uneven skin tone, minimizes the appearance of pores, and supports overall skin smoothness.

HOW TO USE

Clean the skin with antiseptic

Prepare MTS roller

Use iREJU WHITE SERUM on the face area

To decrease neck wrinkles and uneven tone, it also can be used on the neck

Be careful in delicate areas such as area around mouth

Apply soothing cream by gently patting the skin

PROTOCOL

- Course consists of 4 sessions with interval 2–3 weeks, 5th session after 4 weeks of resting time
- iREJU WHITE SERUM naturally restores the intradermal structure and improves the condition of wounded or damaged skin
- The best result will be after 4 sessions with one maintaining session after the course

CAUTIONS

- ❖ For people with existing skin problems such as acne, the treatment should be performed only after the skin has fully healed.
- ❖ If there are any hygiene issues during the procedure, bacteria can enter the skin and cause inflammation, so proper care is essential.

BEFORE & AFTER

Area around eyes before

Area around eyes 4 weeks later

POST TREATMENT

- ❖ It is prohibited to use chemical treatments such as hair dye after the procedure
- ❖ Refrain from applying makeup for at least 4 hours after the treatment
- ❖ As the treatment requires a regeneration period, the visible effect usually appears about one month after the first session
- ❖ Redness and a feeling of warmth may occur after the procedure, so it is necessary to soothe the skin with a mask, for example, the iREJU XO Hydrogel Mask, which will also enhance the treatment results
