

# iREJU

The most powerful skinbooster with exosomes

**Lyophilized Powder**

**Diluent**

### PACKING

- 1 Lyophilized powder
- + 1 Diluent\*1 set
- 3 sets\*1box

### WHAT IS iREJU XO?

iREJU XO is a powerful next-generation skinbooster containing 4 billion exosomes, combined with hyaluronic acid, growth factors, peptides, and glutathione. The exosomes are produced in GMP-certified facilities specializing in advanced exosome manufacturing.

### USED FOR

- Sensitive skin
- Rough and dry skin
- Enlarged pores and redness
- Flabby skin that has lost its elasticity
- Disappeared glow and vitality in the skin

### INSIDE iREJU XO

- Adipose derived stem cell
- Adipose stem cell conditioned media
- 4 billion particles of exosomes that will fundamentally regenerate your skin

### EFFECT

- Skin rejuvenation
- Improvement of the skin elasticity
- Increasing the production of collagen
- Elimination of wrinkles and improvement of skin tone
- Treatment of hypermelanosis by reducing the melanin content in the cells

Skin Protection

Skintone Improvement

Inflammation Relief

Regeneration Boost

Skin Hydration

## HOW TO USE

1. Mix 1 vial (lyophilized powder) with 1 vial (diluent)
2. Apply with MTS Roller or another form of mesotherapy to the face and neck skin
3. It is recommended to perform 3-5 sessions with interval of 4 weeks
4. The effect will appear on the skin after 6-7 weeks from the 1st session

## MAIN INGREDIENTS

### Lyophilized Powder

#### Adipose stromal/stem cells (ASCs)

Ideal cell type for regenerative medicine applications, as they can be easily harvested from adipose tissue in large quantities. ASCs have excellent proliferation, differentiation, and immunoregulatory capacities, which have been demonstrated in numerous studies.

#### Adipose stem cell conditioned media

Improves wound healing by promoting re-epithelialization and vascularization as well as modulating the inflammatory immune response.

### Diluent

#### D-Biotin

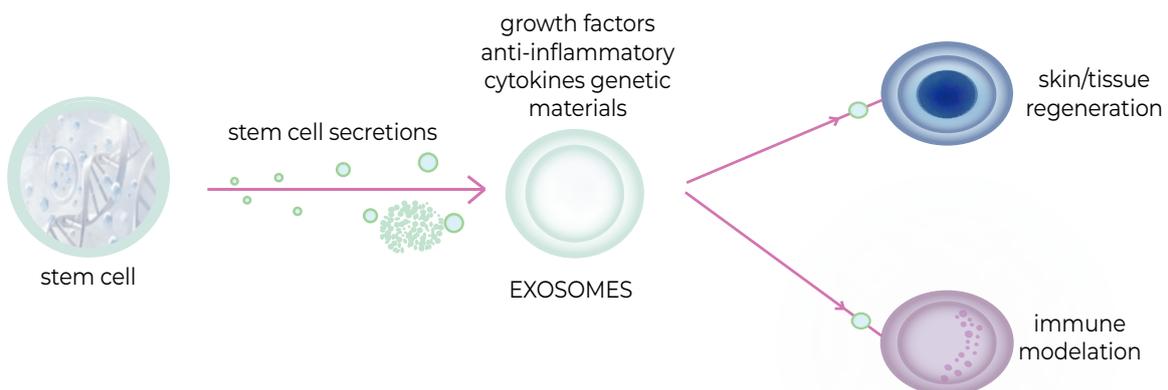

An essential nutrient that strengthens hair and supports tissue formation. It provides multiple benefits, including enhancing skin radiance, elasticity, and hydration, as well as helping regulate melanin production - all of which contribute to improving various skin concerns.

#### Tranexamoyl Dipeptide-23

Suppresses melanin production and helps improve skin pigmentation. It is used to reduce dark spots, melasma, and acne marks, while also enhancing skin elasticity, minimizing wrinkles, and soothing inflammation.

#### Tetrapeptide-44

Naturally derived peptide that is non-toxic to the skin and has an anti-inflammatory effect.

iREJU XO action process

## iREJU XO action process

Lyophilized powder  
for  
powerful skin improvement  
and  
nutrition supply

Activating solution  
for  
maximum absorption  
of  
active ingredients

## POST TREATMENT

- ❖ It is prohibited to use chemical treatments such as hair dye after the procedure
- ❖ Refrain from applying makeup for at least 4 hours after the treatment
- ❖ As the treatment requires a regeneration period, the visible effect usually appears about one month after the first session
- ❖ Redness and a feeling of warmth may occur after the procedure, so it is necessary to soothe the skin with a mask, for example, the iREJU XO Hydrogel Mask, which will also enhance the treatment results
