

iREJU PRIME

The most powerful skinbooster with exosomes

iREJU XO PRIME

Lyophilized powder

Mannitol

Vitis Vinifera

Malus Domestica

Peptides

Vitamins

Sodium Hyaluronate

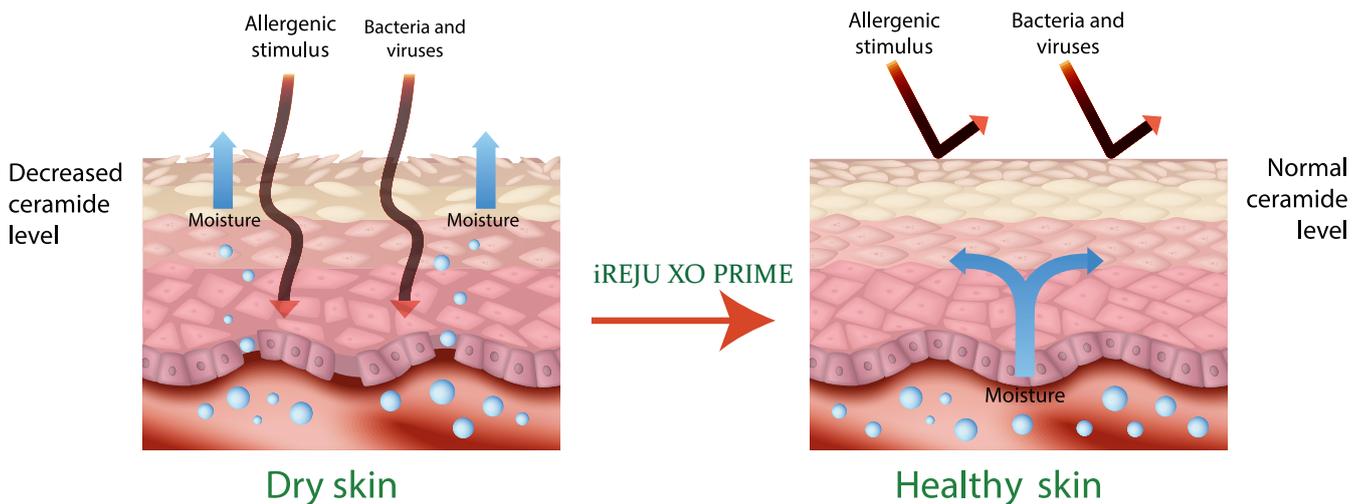

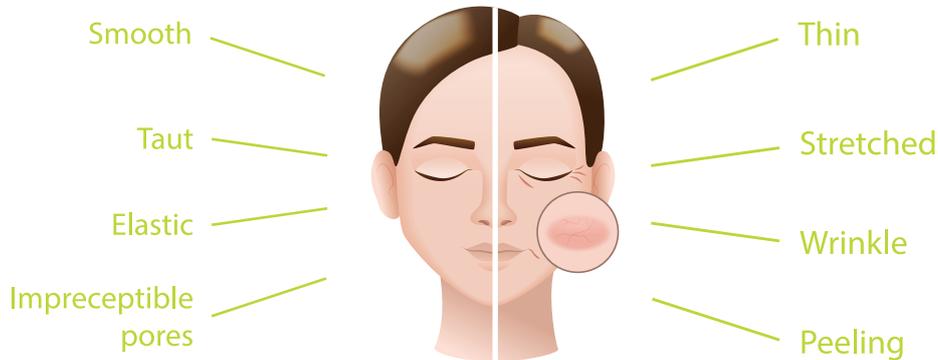

Diluent

PACKING

1 Lyophilized powder
+ 1 Diluent*1 set
3 sets*1box

WHAT IS iREJU XO PRIME?

iREJU XO PRIME is a powerful next-generation skin booster containing 4 billion exosomes, combined with grape extract, apple extract, growth factors, peptides, and glutathione, manufactured using exosome-specialized GMP technology.

EFFECTS

- Rejuvenation and cell regeneration: Active ingredients such as peptides and exosomes stimulate cell regeneration and collagen production, improving skin firmness and elasticity while reducing the appearance of wrinkles and fine lines.
- Deep hydration: Thanks to hyaluronic acid, mannitol, and other humectants, the treatment provides long-lasting hydration, improving skin texture and restoring vitality.
- Reduction of inflammation and improvement of skin texture: Ingredients such as tranexamic dipeptide-23 and antioxidants help reduce inflammation, protect the skin from environmental damage, and promote a smoother, brighter, and healthier complexion.
- Protection against premature aging: Antioxidants such as grape extract and vitamin C help neutralize free radicals, preventing premature aging and keeping the skin youthful and radiant.

MAIN INGREDIENTS

Lyophilized Powder

Pentapeptide-13, Tripeptide-29, Acetyl Hexapeptide-8, Tetrapeptide-44, Palmitoyl Pentapeptide-4

A peptide complex that helps regenerate the skin, improve firmness and elasticity, and reduce the appearance of wrinkles.

Tranexamoyl Dipeptide-23

Helps reduce inflammation and supports cellular repair.

Panthenol (Provitamin B5)

A moisturizing and soothing ingredient that promotes skin repair.

Sodium Hyaluronate

Provides deep hydration and improves skin elasticity.

Vitamins B, C, and other amino acids

Essential nutrients that promote cell regeneration, protect against environmental damage, and improve overall skin health.

Diluent

Malus Domestica (Apple Extract)

Known for its antioxidant properties, helping protect the skin from free radical damage and prevent premature aging.

Vitis Vinifera (Grape Extract)

Exhibits regenerative properties and stimulates cell renewal, supporting skin regeneration.

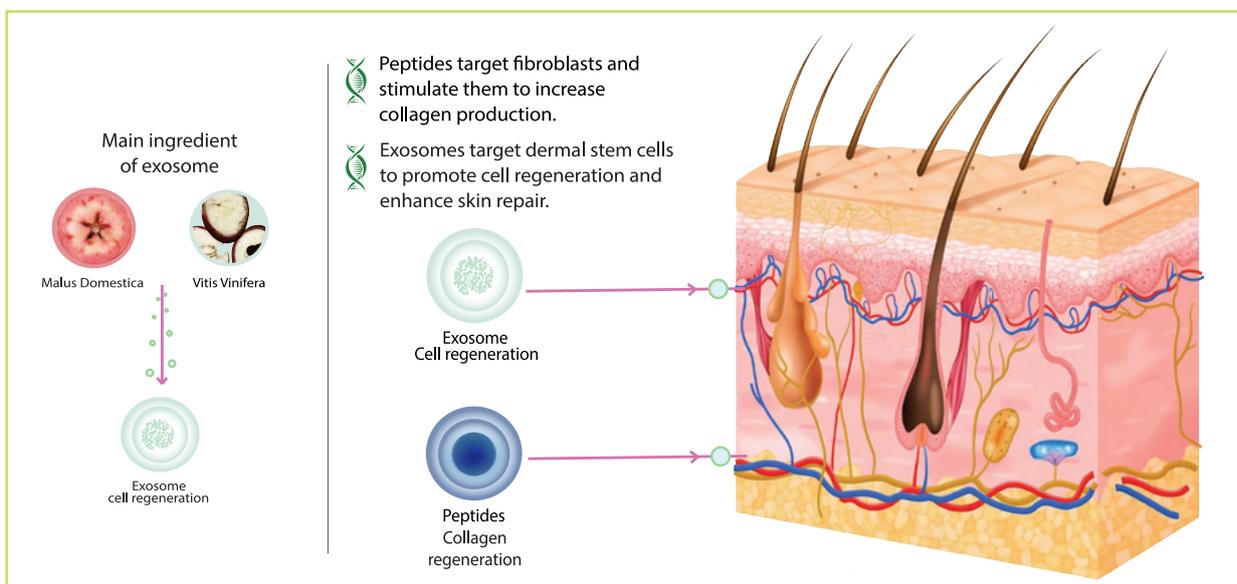

Mannitol

A humectant that helps improve skin elasticity and hydration.

sh-Oligopeptide-1, sh-Polypeptide-1, sh-Polypeptide-2, sh-Polypeptide-10

Growth factor-type peptides that stimulate cell regeneration and collagen production, improving skin firmness and reducing wrinkles.

ACTION PROCESS

HOW TO USE

1. Mix 1 vial (lyophilized powder) with 1 vial (diluent)
2. Apply with MTS Roller or another form of mesotherapy to the face and neck skin
3. It is recommended to perform 3-5 sessions
4. The effect will appear on the skin after 6-7 weeks from the 1st session

RECOMMENDED FREQUENCY OF USE

Initial Treatment Phase

Frequency: 1-2 sessions per week for the first 3-4 weeks.

This initial phase is designed to stimulate collagen production, boost skin regeneration, and provide deep hydration. It helps establish a strong foundation for long-term skin rejuvenation.

Maintenance Phase

Frequency: 1 session every 4-6 weeks after completing the initial phase.

Once the first series of treatments is completed, the frequency can be reduced to maintain results. Maintenance sessions help ensure the skin continues to regenerate while remaining firm, smooth, and well hydrated.

Long-Term Maintenance

For optimal and lasting results, clients may incorporate one session every 3-6 months. This is especially beneficial when targeting deeper wrinkles, skin laxity, or more advanced signs of aging.
